PREFACE

The present bibliography contains nearly 200 selected references on studies in work and leisure published chiefly during 1925-1972. The references listed in the bibliography are by no means definitive nor are they meant to be, but they represent many of old and current publications which may be used as guides for further research.

The bibliography is divided into Two parts: Part One contains listing of books and monographs and Part Two is a listing of articles and periodicals in that area. The references are arranged by the author in alphabetical order when possible.

I would like to thank Mrs. Mary Vance, Editor, Council of Planning Librarians, for her encouragement and assistance in the completion of this bibliography. The sole responsibility for any errors and/or omissions is mine.

It is my hope that those engaged in various aspects of work and leisure research will find this reference material a useful and informative instrument.
